

Virginia Rail

Greenbank Farm's wetland benefits dozens of bird species, from Great Blue Herons to secretive Virginia Rails.

An elevated platform, shown in the photo below, provides an overview of the wetland. Utilizing the nearby service road allows a closer look at select wetland areas.

This 151-acre farm's wetland, open field, woodland/edge and holding pond habitats attract a wide array of birds. Local art and foods are available in shops, galleries and cafe near the main barn and parking area.

765 Wonn Road, Greenbank, WA 98253

*Harry the Woodpecker's Search for a Home*  
by Joy & Craig Johnson

Fly alongside a pair of remarkable Hairy Woodpeckers as they face and overcome challenges, create a nest cavity and teach their youngsters how to forage and survive on their own.

Beautifully illustrated in watercolor, this story is both fun and true-to-life. A great way to introduce kids to birds they may see in their own backyard.
